

The floor plan illustrates the layout of a wastewater treatment plant. Key features include:

- hala zbiorników**: A large rectangular structure on the right side, likely housing storage tanks.
- stacja filtrów**: A rectangular structure below the storage tank hall, used for filtering the wastewater.
- chlorownia**: A structure on the left side, used for the chlorination process.
- rozdzielnia**: A structure at the bottom left, likely a distribution or control unit.
- WC**: Restroom facilities located near the distribution unit.
- kanal technologiczny**: A technical channel running through the center of the plan.

The plan is heavily annotated with dimensions in centimeters, providing precise measurements for the various components and their spacing. A scale bar at the bottom indicates a scale of 1:1000. The drawing is oriented with North at the top.
